## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 29 September 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114 was filed in this application after a decision by the Board of Patent Appeals and Interferences, but before the filing of a Notice of Appeal to the Court of Appeals for the Federal Circuit or the commencement of a civil action. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on September 29, 2004 has been entered.

Claims 1-2 and 5-6 are pending.

### ***Claim Objections***

Claim 2 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim 2 reciting a "circle segment" does not further limit claim 1 reciting a "spherical cup." A spherical cup inherently has a circle segment.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 5-6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gaylon et al (Figure 9 or 10).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2 and 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cermak in view of Gaylon et al.

Cermak discloses all the claimed limitations except the troughs having a spherical cup form.

Gaylon et al (Figure 9 or 10) discloses a heat exchanger comprising a plurality of impingement orifices in carrier 906 or 1002; and wall parts (collectively 903, 904a-b) having a remote planar side and spherical cup impingement side 902 for the purpose of improving fluid dynamics for heat transfer (column 7, lines 18-20).

Since Cermak and Gaylon et al are both from the same field of endeavor and/or analogous art, i.e. impingement cooling, the purpose disclosed by Gaylon et al would have been recognized in the pertinent art of Cermak.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ in Cermak troughs having a spherical cup form for the purpose of improving fluid dynamics for heat transfer as recognized by Gaylon et al.

***Response to Arguments***

The rejections in view of Ashiwake et al, Livingood et al and Wettstein are withdrawn.

The rejection of Cermak in view of Gaylon et al is believed tenable, even though the Board of Appeals and Interferences reversed the rejection in view of Cermak and Ashiwake et al. The Board did not appreciate the motivation to combine the references of Cermak and Ashiwake et al. However, Galyon et al explicitly provides a motivation.

No further comments are deemed necessary at this time.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
